**PRACTICAL No. 2**

**Aim: Password Encryption and Cracking with CrypTool and Cain and Abel**

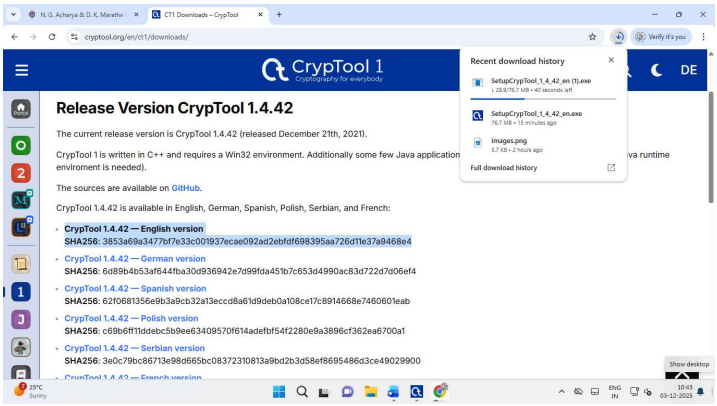
**A) Password Encryption and Decryption :**

- **Use CrypTool tp encrypt passwords using RC4 Algorithm.**
- **Decrypt the encrypted passwords and verify the original values.**

**Step1: Install CrypTool**

Download CrypTool 1.4.41(classic version)

https://www.cryptool.org./en/ct1-downloads

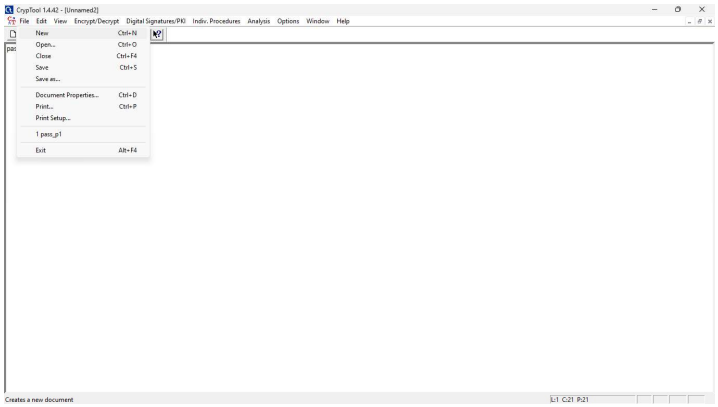


Install on windows.

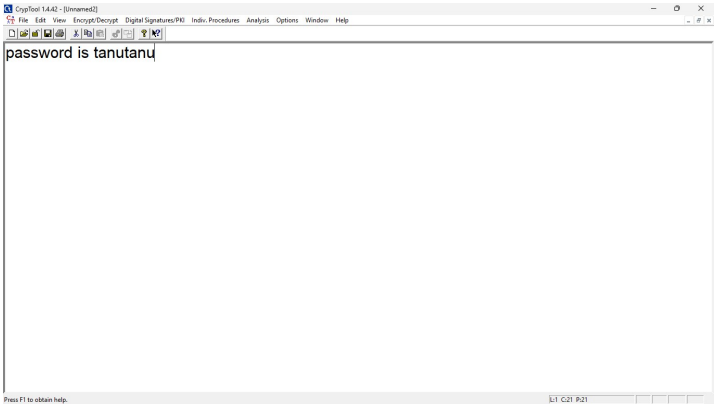
Open CrypTool.exe

**Step 2: Enter a Sample Password**

1. Go to File → New

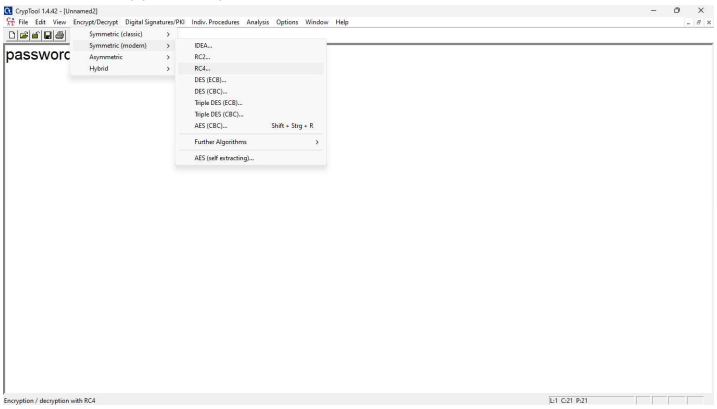


2. Type your Sample Password, e.g.

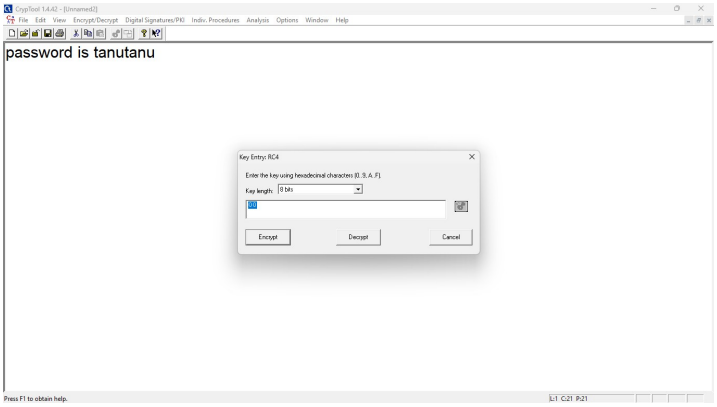


## Step 3: Encrypt Password Using RC4 Algorithm

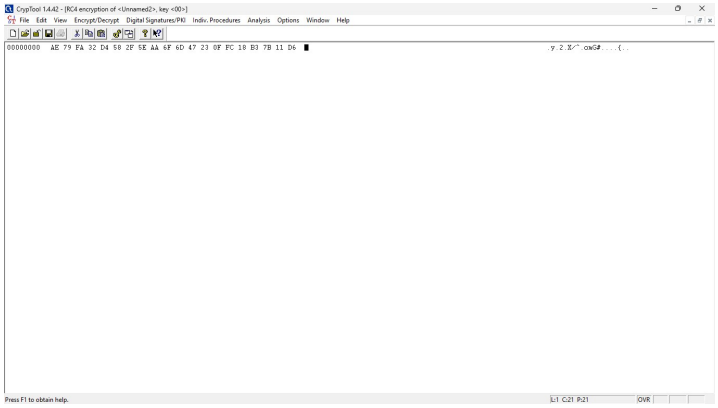
1. Go to: Encrypt → Symmetric (modern) → RC4



2. Select Encrypt for the encryption of the text.



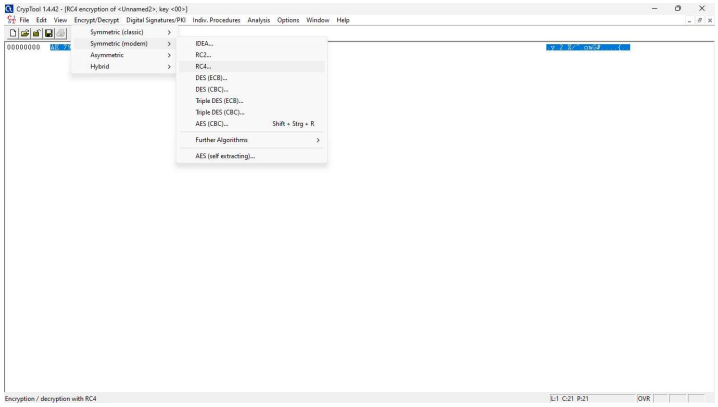
3. The encrypted cipher text will appear.



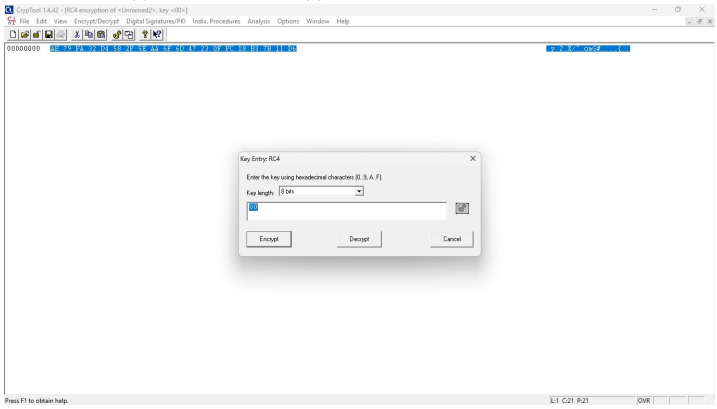
- **Decrypt the encrypted passwords and verify the original values.**

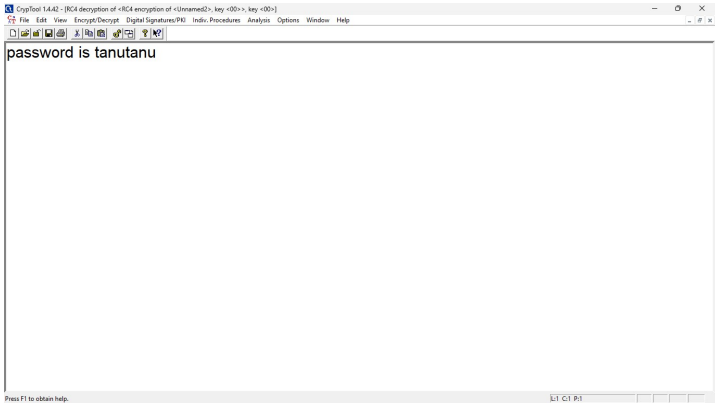
## Step 4 : Decrypt Password Using RC4 Algorithm

1. Select the encrypted text.
   Go to: Decrypt → Symmetric (modern) →RC4



2. Select Decrypt for the decryption of the text.





3. The decrypted plain text will appear.
